Service Outage – Nov 30, 2003

Mobile Satellite Ventures will be performing scheduled maintenance on the communications satellites MSAT-1 and MSAT-2 on Nov. 30, 2003 between 07:00 and 09:00 UT (02:00-04:00 EST). During this time all services will be unavailable, including the CDGPS service.

This maintenance will restore service levels to customers in the West Beam and East Beam to the levels they were prior to the failure of MSAT-1 in May 2003,.
